POWDER TECHNOLOGY

Subject Index of Volume 99

Acrylic bone cement
a rheological, thermal and mechanical study of bone cement — from a suspension to a solid biomaterial, 60
Adhesion
a theoretical model for the stick/bounce behaviour of adhesive, elastic–plastic spheres, 154
Adsorption of surfactants
a study on the stability and rheological behavior of concentrated TiO_2 dispersions, 171
Agglomerated alumina
the effects of wall friction on the ejection of pressed ceramic parts, 228
Agglomeration
liquid-bound granule impact deformation and coefficient of restitution, 234
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243
Alumina–chromium composite powders
surface properties of mechanosynthesized Al_2O_3–Cr nanocomposite powders, 257
Alumina spheres
heat transfer in shallow vibrated beds, 293
Arching
arching phenomena in a vibrated granular bed, 185
Atomiser geometry
producing fine drops of water by twin-fluid atomisation, 285
Axial dispersion
slip velocity and axial dispersion measurements in a gas–solid pipeline using particle tracer analysis, 125

Baffle plate
the heat transfer performance of a gas–solid contactor with regularly arranged baffle plates, 302
Ball mill
fine wet grinding of an alumina hydrate in a ball mill, 147
Bed collapse
dynamics of collapsing fluidized beds and its application in the simulation of pulsed fluidized beds, 132
Breakage distribution
breakage of coals in ring-roller mills. Part 2. An unsteady-state simulation model, 46
Breakage rates
breakage of coals in ring-roller mills. Part 2. An unsteady-state simulation model, 46
Bulk solids
measurement of solids flow patterns in a gypsum silo, 272

Cake formation
optical in situ measurement of dust cake thickness distributions on rigid filter media for gas cleaning, 177
Capillary
producing fine drops of water by twin-fluid atomisation, 285
Capillary forces
liquid-bound granule impact deformation and coefficient of restitution, 234
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243
Characterization
effect of moisture on the yield locus of granular materials: theory of shift, 220
Circulating fluidized beds
gas backmixing in a circulating fluidized bed, 70
a novel method for isokinetic measurement of particle flux within the riser of a circulating fluidized bed, 211
Coating mass distribution
coating mass distributions of seed particles in a tumbling fluidized bed coater. Part II. A Monte Carlo simulation of particle coating, 140
Coefficient of restitution
liquid-bound granule impact deformation and coefficient of restitution, 234
Cohesive powder separation
dispersion and transport of cohesive lactose powder using travelling wave field technique, 251
Comminution
fine wet grinding of an alumina hydrate in a ball mill, 147
Compaction
the effects of wall friction on the ejection of pressed ceramic parts, 228
Consolidation
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243
Contact mechanics
a theoretical model for the stick/bounce behaviour of adhesive, elastic–plastic spheres, 154
Convection
arching phenomena in a vibrated granular bed, 185
Copper-encapsulation technique
development of $LaNi_5$/Cu/Sn metal hydride powder composites, 40
Core–annulus suspension structure
flow structure in a fast fluid bed, 194
Core-annulus flow structure
a novel method for isokinetic measurement of particle flux within the riser of a circulating fluidized bed, 211
Core annulus model
gas backmixing in a circulating fluidized bed, 70

Density gradients
tactile sensing of density uniformity in powder beds after die filling, 119
Density uniformity
tactile sensing of density uniformity in powder beds after die filling, 119
Die filling
tactile sensing of density uniformity in powder beds after die filling, 119

Elsevier Science S.A.

Differential scanning calorimetry
a rheological, thermal and mechanical study of bone cement — from a suspension to a solid biomaterial, 60
Dispersion
a study on the stability and rheological behavior of concentrated TiO_2 dispersions, 171
Drying
on-line monitoring of moisture content in an instrumented fluidized bed granulator with a multi-channel NIR moisture sensor, 163
Dry shape separator
continuous separation of differently shaped fine particles on a rotating vibrating conical disk—effects of different operating conditions on separation characteristics under various throughputs, 1
Dynamic contact angle
powder dynamic contact angle measurements: Young contact angles and effectively wet perimeters, 264
Dynamic yield stress
liquid-bound granule impact deformation and coefficient of restitution, 234
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243

Ejection
the effects of wall friction on the ejection of pressed ceramic parts, 228
Euler/Lagrange approach
modelling and numerical calculation of dilute-phase pneumatic conveying in pipe systems, 90
Experimental methods
a novel method for isokinetic measurement of particle flux within the riser of a circulating fluidized bed, 211
measurement of solids flow patterns in a gypsum silo, 272

Fast fluidization
flow structure in a fast fluid bed, 194
Filter regeneration
optical in situ measurement of dust cake thickness distributions on rigid filter media for gas cleaning, 177
Fine particle
continuous separation of differently shaped fine particles on a rotating vibrating conical disk—effects of different operating conditions on separation characteristics under various throughputs, 1
flow patterns of fine particles in a vibrated fluidized bed under atmospheric or reduced pressure, 11
Finite elements
finite element simulation of granular material flow in plane silos with complicated geometry, 29
Flow pattern
measurement of solids flow patterns in a gypsum silo, 272
Flow structure
flow structure in a fast fluid bed, 194
Fluidised beds
study and model of the hydrodynamic behaviour of a gas-solid magnetically stabilized fluidized bed, 201
Fluidization
flow patterns of fine particles in a vibrated fluidized bed under atmospheric or reduced pressure, 11
Fluidized bed granulation
on-line monitoring of moisture content in an instrumented fluidized bed granulator with a multi-channel NIR moisture sensor, 163
Fluidized bed viscosity
fluidized bed viscosity measurements in reduced gravity, 53

Gas–solid contactor
the heat transfer performance of a gas–solid contactor with regularly arranged baffle plates, 302
Gas–solid fluidized beds
mesoscopic approach to correlate surface heat transfer coefficients with pressure fluctuations in dense gas–solid fluidized beds, 109
Gas–solid pipeline
slip velocity and axial dispersion measurements in a gas–solid pipeline using particle tracer analysis, 125
Gas backmixing coefficients
gas backmixing in a circulating fluidized bed, 70
Gas cleaning
optical in situ measurement of dust cake thickness distributions on rigid filter media for gas cleaning, 177
Gas flow
modeling solids and gas flow through an L-valve, 86
Glass beads
heat transfer in shallow vibrated beds, 293
Granular flow
finite element simulation of granular material flow in plane silos with complicated geometry, 29
Granular material
arching phenomena in a vibrated granular bed, 185
Granular materials
finite element simulation of granular material flow in plane silos with complicated geometry, 29
Granular temperature
arching phenomena in a vibrated granular bed, 185
Granulation
liquid-bound granule impact deformation and coefficient of restitution, 234
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243
Granule
powder dynamic contact angle measurements: Young contact angles and effectively wet perimeters, 264
Grinding
particle size distribution soft-sensor for a grinding circuit, 15
Gypsum
measurement of solids flow patterns in a gypsum silo, 272

Heat transfer
heat transfer in shallow vibrated beds, 293
Heat transfer coefficient
the heat transfer performance of a gas–solid contactor with regularly arranged baffle plates, 302
Hydrodynamics
study and model of the hydrodynamic behaviour of a gas-solid magnetically stabilized fluidized bed, 201

Impact
a theoretical model for the stick/bounce behaviour of adhesive, elastic–plastic spheres, 154
Impact deformation
liquid-bound granule impact deformation and coefficient of restitution, 234
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243
In situ measurement
optical in situ measurement of dust cake thickness distributions on rigid filter media for gas cleaning, 177
Interparticle collisions
modelling and numerical calculation of dilute-phase pneumatic conveying in pipe systems, 90
Inter-particle friction
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243

Liquid addition
effect of liquid addition on the packing of mono-sized coarse spheres, 22
L-valve
modeling solids and gas flow through an L-valve, 86

Magnetism
study and model of the hydrodynamic behaviour of a gas-solid magnetically stabilized fluidized bed, 201
Mass transport
breakage of coals in ring-roller mills. Part 2. An unsteady-state simulation model, 46
Mechanical strength
a rheological, thermal and mechanical study of bone cement — from a suspension to a solid biomaterial, 60
Mechanosynthesis
surface properties of mechanosynthesized Al_2O_3–Cr nanocomposite powders, 257
Mesoscopic approach
mesoscopic approach to correlate surface heat transfer coefficients with pressure fluctuations in dense gas–solid fluidized beds, 109
Metal hydride powder composites
development of $LaNi_5$/Cu/Sn metal hydride powder composites, 40
Mill flow rates
breakage of coals in ring-roller mills. Part 2. An unsteady-state simulation model, 46
Mill hold-up
breakage of coals in ring-roller mills. Part 2. An unsteady-state simulation model, 46
Mix uniformity
tactile sensing of density uniformity in powder beds after die filling, 119
Models
dynamics of collapsing fluidized beds and its application in the simulation of pulsed fluidized beds, 132
study and model of the hydrodynamic behaviour of a gas-solid magnetically stabilized fluidized bed, 201
Moisture content
on-line monitoring of moisture content in an instrumented fluidized bed granulator with a multi-channel NIR moisture sensor, 163
Mono-sized spheres
effect of liquid addition on the packing of mono-sized coarse spheres, 22
Monte Carlo simulation
coating mass distributions of seed particles in a tumbling fluidized bed coater. Part II. A Monte Carlo simulation of particle coating, 140
Multiple regression analysis
continuous separation of differently shaped fine particles on a rotating vibrating conical disk—effects of different operating conditions on separation characteristics under various throughputs, 1

Nanometer range
surface properties of mechanosynthesized Al_2O_3–Cr nanocomposite powders, 257
NASA's KC-135
fluidized bed viscosity measurements in reduced gravity, 53
Near infrared (NIR) spectroscopy
on-line monitoring of moisture content in an instrumented fluidized bed granulator with a multi-channel NIR moisture sensor, 163
Numerical calculations
modelling and numerical calculation of dilute-phase pneumatic conveying in pipe systems, 90

Packing
effect of liquid addition on the packing of mono-sized coarse spheres, 22
Particle–wall collisions
modelling and numerical calculation of dilute-phase pneumatic conveying in pipe systems, 90
Particle behavior
breakage of coals in ring-roller mills. Part 2. An unsteady-state simulation model, 46
Particle flux
a novel method for isokinetic measurement of particle flux within the riser of a circulating fluidized bed, 211
Particle size
physical and chemical characterisation of some silicas and silica derivatives, 79
Particle size distribution
particle size distribution soft-sensor for a grinding circuit, 15
Particle tracer analysis
slip velocity and axial dispersion measurements in a gas–solid pipeline using particle tracer analysis, 125
Patchy cleaning
optical in situ measurement of dust cake thickness distributions on rigid filter media for gas cleaning, 177
Pellet
on-line monitoring of moisture content in an instrumented fluidized bed granulator with a multi-channel NIR moisture sensor, 163
Perimeter
powder dynamic contact angle measurements: Young contact angles and effectively wet perimeters, 264
Permeability
development of $LaNi_5$/Cu/Sn metal hydride powder composites, 40
Pneumatic conveying
modelling and numerical calculation of dilute-phase pneumatic conveying in pipe systems, 90
Pore size distribution
physical and chemical characterisation of some silicas and silica derivatives, 79
Porosity
effect of liquid addition on the packing of mono-sized coarse spheres, 22
Powders
powder dynamic contact angle measurements: Young contact angles and effectively wet perimeters, 264
Pressure
dynamics of collapsing fluidized beds and its application in the simulation of pulsed fluidized beds, 132
Pressure distribution
tactile sensing of density uniformity in powder beds after die filling, 119
Pressure drop
modeling solids and gas flow through an L-valve, 86
Projected fringe
optical in situ measurement of dust cake thickness distributions on rigid filter media for gas cleaning, 177
Pulsed fluidized beds
dynamics of collapsing fluidized beds and its application in the simulation of pulsed fluidized beds, 132

Radiopaque powders
a rheological, thermal and mechanical study of bone cement — from a suspension to a solid biomaterial, 60
Random walk
coating mass distributions of seed particles in a tumbling fluidized bed coater. Part II. A Monte Carlo simulation of particle coating, 140
Reduced gravity
fluidized bed viscosity measurements in reduced gravity, 53
Reduced pressure
flow patterns of fine particles in a vibrated fluidized bed under atmospheric or reduced pressure, 11
Residence time
measurement of solids flow patterns in a gypsum silo, 272
Restitution
a theoretical model for the stick/bounce behaviour of adhesive, elastic–plastic spheres, 154
Rheological behavior
a study on the stability and rheological behavior of concentrated TiO_2 dispersions, 171

Rheology
a rheological, thermal and mechanical study of bone cement — from a suspension to a solid biomaterial, 60
Rigid filter media
optical in situ measurement of dust cake thickness distributions on rigid filter media for gas cleaning, 177
Ring-roller miller
breakage of coals in ring-roller mills. Part 2. An unsteady-state simulation model, 46
Rotating vibrating conical disk
continuous separation of differently shaped fine particles on a rotating vibrating conical disk—effects of different operating conditions on separation characteristics under various throughputs, 1
Roughness
powder dynamic contact angle measurements: Young contact angles and effectively wet perimeters, 264

Separation mechanism
continuous separation of differently shaped fine particles on a rotating vibrating conical disk—effects of different operating conditions on separation characteristics under various throughputs, 1
Silanisation
physical and chemical characterisation of some silicas and silica derivatives, 79
Silica
physical and chemical characterisation of some silicas and silica derivatives, 79
Silo
measurement of solids flow patterns in a gypsum silo, 272
Silo flow
finite element simulation of granular material flow in plane silos with complicated geometry, 29
Size distribution
fine wet grinding of an alumina hydrate in a ball mill, 147
Slip velocity
slip velocity and axial dispersion measurements in a gas–solid pipeline using particle tracer analysis, 125
Soft-sensor
particle size distribution soft-sensor for a grinding circuit, 15
Solid holdup
the heat transfer performance of a gas–solid contactor with regularly arranged baffle plates, 302
Solids flow
modeling solids and gas flow through an L-valve, 86
Stability
a study on the stability and rheological behavior of concentrated TiO_2 dispersions, 171
Suction probe measurements
a novel method for isokinetic measurement of particle flux within the riser of a circulating fluidized bed, 211
Superficial gas velocity
modeling solids and gas flow through an L-valve, 86
Surface area
physical and chemical characterisation of some silicas and silica derivatives, 79
Surface heat transfer coefficients
mesoscopic approach to correlate surface heat transfer coefficients with pressure fluctuations in dense gas–solid fluidized beds, 109
Surface properties
surface properties of mechanosynthesized Al_2O_3–Cr nanocomposite powders, 257
Suspension
a rheological, thermal and mechanical study of bone cement — from a suspension to a solid biomaterial, 60

Tactile sensors
tactile sensing of density uniformity in powder beds after die filling, 119
Tensile strength
effect of moisture on the yield locus of granular materials: theory of shift, 220
Thermal conductivity
development of $LaNi_5$/Cu/Sn metal hydride powder composites, 40
Titanium dioxide
a study on the stability and rheological behavior of concentrated TiO_2 dispersions, 171
Titration
surface properties of mechanosynthesized Al_2O_3–Cr nanocomposite powders, 257
Travelling wave electric field
dispersion and transport of cohesive lactose powder using travelling wave field technique, 251
Tumbling fluidized bed
coating mass distributions of seed particles in a tumbling fluidized bed coater. Part II. A Monte Carlo simulation of particle coating, 140
Twin-fluid atomisation
producing fine drops of water by twin-fluid atomisation, 285

Vibrated bed
arching phenomena in a vibrated granular bed, 185
heat transfer in shallow vibrated beds, 293
Vibration
flow patterns of fine particles in a vibrated fluidized bed under atmospheric or reduced pressure, 11
Vibrofluidized bed
heat transfer in shallow vibrated beds, 293
Viscous dissipation
liquid-bound granule impact deformation and coefficient of restitution, 234
fundamental studies of granule consolidation. Part 2: Quantifying the effects of particle and binder properties, 243

Wall friction
the effects of wall friction on the ejection of pressed ceramic parts, 228
Wet grinding
fine wet grinding of an alumina hydrate in a ball mill, 147
Wet solids
effect of moisture on the yield locus of granular materials: theory of shift, 220
Wettability
powder dynamic contact angle measurements: Young contact angles and effectively wet perimeters, 264

Yield locus
effect of moisture on the yield locus of granular materials: theory of shift, 220

Zeta potential
surface properties of mechanosynthesized Al_2O_3–Cr nanocomposite powders, 257
